EXPERIENCE

Peachy Productions— Senior AV technician

Since November 2019

Setting up, testing, finding and dealing with any faults and operating audio, lighting and video equipment during rehearsals and the events itself.

Testing and servicing equipment, rack building.

Managing equipment booking as per clients request.

Overseeing and managing other members of staff and freelancers.

Providing technical support to clients while maintaining white glove service and high company standards.

Eclipse Presentations — Senior Warehouse Technician

October 2018 - October 2019

Picking the requested kit while working closely with the project management team while ensuring that equipment requirements, cables lists and technical drawings are flawless and match client requirements.

Solving any issues as they arise during equipment preparation or testing, referring to the project management team as necessary.

Supervising and acting as a mentor for Junior Warehouse Technicians and helping with other warehouse duties.

Overseeing goods in/out.
